## PROJECTS

### **AI-Powered Blog App** | MERN Stack, ImageKit.io, Gemini API (🟡 LIVE)

- Built a dynamic blog platform using the MERN stack (MongoDB, Express.js, React.js, Node.js) that helps users create and refine content effortlessly.
  - Integrated Gemini API for AI-driven content summarization, title suggestions, and SEO optimization.
  - Used ImageKit.io for seamless image uploads, real-time transformations, and CDN optimization, improving load times and responsiveness across devices.
- 

### **AI-Powered Notes Storage & Description Generator App** | MERN Stack, ImageKit.io, Gemini API (🟡 LIVE)

- Designed and developed a full-stack web application for storing and managing notes, enriched by AI-generated summaries and descriptions to improve searchability and user productivity.
  - Leveraged Gemini API for natural language processing and automatic metadata creation.
  - Implemented ImageKit.io for efficient media storage, real-time image enhancement, and CDN delivery, ensuring fast and responsive user experience.
- 

### **ANIMI (PERSONAL AI TOOL FOR RESEARCH AND TEXT GENERATION)** | React.js, Gemini API (🟡 LIVE)

- Developed a modern React.js web app that assists users in research and content creation by generating context-aware summaries and text suggestions.
- Integrated Gemini API to enable AI-powered text generation, contextual rewriting, and semantic search capabilities inspired by Gemini AI.

- Designed intuitive and responsive UI components, focusing on usability and seamless AI interactions to boost user productivity.
- 

### **ANICRYPTO (Real-Time Crypto News & Coin Info App) | React.js, Chart.js, CoinGecko API, NewsData.io API (🟢LIVE)**

- Developed a responsive dashboard to display live cryptocurrency prices, charts, and the latest market news.
  - Integrated CoinGecko API for real-time coin data and NewsData.io API for aggregated crypto-related news.
- 

### **ANICHAT (Communication and image sharing app) | MERN stack, socket.io**

- Currently developing a real-time chat platform with text and image sharing capabilities.
  - Frontend fully completed using React.js and Tailwind CSS, delivering a responsive and user-friendly interface.
  - Integrating Socket.io to enable instant messaging and dynamic, room-based conversations.
  - Backend development in progress with Node.js, Express.js, and MongoDB to implement secure authentication and data management.
-
